Vancouver Full Stack Developers Meetup*

The Vancouver Full Stack Meetup group brings together developers who want to learn more about the ins-and-outs of developing web applications from the frontend layer down to the guts of the backend. We welcome discussions about different technologies, concepts, best practices and the combination thereof: Ruby on Rails, Javascript, React, Python, Django, Angular, Play Framework, SQL, ASP.NET and others. Developers of all levels are welcome to participate by attending, giving talks and make new connections.

Vancouver Developers*

We are a group of developers from Vancouver and the surrounding areas, dedicated to creating a supportive environment where you can share knowledge, collaborate on projects, and build lasting professional relationships. We host weekly meetup events focused on continuous learning and skill development. Our sessions are designed to help you sharpen your problem-solving abilities and expand your knowledge. Join us and be a part of a group that fosters growth, innovation, and collaboration. We look forward to seeing you at our next meetup!

Agile Vancouver*

Agile Vancouver is a volunteer-driven community that supports the exchange of ideas and experiences around an agile mindset and agile approaches. We aim to serve the local community of agile practitioners by providing a platform for inspiration, learning, growth, connections and shared experiences. No matter if you're a seasoned agile practitioner or new to agile methodologies, we look forward to seeing you at our monthly (currently online) events, where leading agile practitioners from the Vancouver region and around the world share their stories, insights and experiences. Join our [Slack](#) workspace to introduce yourself to the community, connect with others, ask questions or meet for (virtual) coffee. Follow us on [LinkedIn](#) to stay informed about upcoming events!

<u>Leet Code Lounge*</u>	Practice, Prep, and Problem Solve	Thursdays
